APS Public School
Percentage: **88.1%**

Career Objective

To secure a challenging position in a reputable organization to expand my learnings, knowledge, and skills.

Work Experience

June 2018 - Present
Project Manager (Part-Time)
at GRID R&D

- Worked on an **English Communication Portal (ELTS)** using the tech stack of PHP and frontend tools.
- Trained and guided a team of 13 interns on Full Stack Development.
- Collaborated with a team of senior developers to create system, database design and project documentation.
- Co-ordinated **meetings** with potential clients to understand their requirement specification.
- Integrated **PhonePe** payment gateway to one of the projects, using **Postman** & the **APIs** provided

Projects

AI-POWERED JOB PORTAL

- **Tech Stack: Django Framework, Python, MySQL.**
- Unique features like Resume Scoring, matching job description with resume were implemented using ML algorithms.
- Job alerts will be given based on the resume data scraped.
- Implemented database models for easy migration to any database technology.

ENGLISH PRACTICE PORTAL [ELTS]

- **Tech Stack: HTML, CSS, JS, PHP, MySQL.**
- Implemented voice recognition using google TTS engine to check users' pronunciation and score them accordingly
- Typing test was added to let users practice and improve typing speed implemented using JavaScript.

Research Work & Publications

- Working on a patenting-research project which will revolutionize the mental health industry using AI/ML.
